Empowering Organisations through Technology

STRUCTURED CABLING - PASSIVE NETWORKING

It is used for the integration of various systems to enable the transmission of voice, data, and video signals. The demand for high-speed connectivity, convergence and expansion of communication infrastructure has contributed to the growth of this segment for VIT.

DATACENTER SOLUTION

As organizations experience rapid growth, the need to fully modernize datacenter infrastructure management solutions is a priority. VIT has been in the forefront of datacenter solutions design & implementation. A modernized datacenter bolsters enterprise security, enhancing IT efficiency and increases company productivity.

ACTIVE NETWORKING

Active Components such as switches, routers are the backbone for any sort of IT networking and communication in an organization and is now unavoidable. Networking is not only limited to wired based switching and has expanded to cloud based services.

WIRELESS NETWORKING

The increase in IP traffic and higher adoption of mobile computing devices are driving the deployment of WLAN solutions. VIT is well positioned in the market with the latest suite of wireless products and High Speed Internet Access (HSIA) to cater to the explosion of IoT, Mobile and transformed systems along with higher bandwidth capability.

PABX TELEPHONE SYSTEM

As with any business, a telephony system is vital for productivity & customer or guest management. VIT has been involved in implementation of IP, analog or hybrid systems taking into consideration the best practices and certifications from the manufacturers.

CCTV AND VIDEO SURVEILLANCE

VIT has been involved in the implementation of CCTV & VMS for major projects designing bespoke solutions and adhering to the latest standards set by the market, government and regulators. Our solutions have powered strategic assets, hotels, villas and corporations.

AUDIO-VIDEO SOLUTIONS

A complete turnkey AV Solutions is offered by VIT ranging from Display solutions, Advanced video distribution, Background Music, Public Address Systems, Queue Management System, Meeting Room setup on an industry specific solution basis ranging from Airports, Corporations, Hospitals, Hotels amongst many.

IPTV AND DIGITAL SIGNAGE

VIT has been involved in taking Video distribution to another level with the networked/wireless based IPTV and Digital Signage Solution which has brought a centralized manageability, flexibility and scalability to the traditional system with a return on investment, enhanced productivity and customer experience.

POWER SOLUTIONS - UPS AND ENERGY SAVER

VIT is involved in bringing in a unique and innovative technology that helps save electricity bills on a long term basis with an assured ROI thereby helping to reduce the carbon footprint and promote a sustainable business to the end user.

ACCESS CONTROL, DOOR LOCK AND GATE BARRIER

VIT has been involved with Access Control solutions by using Fingerprint, Card based, Face and Iris recognition for authorized entry to restricted areas which can involve Door Locks, Turnstiles and Gates. VIT has also taken one step further by taking this system online so that the building security can have a location by location live monitoring and reporting.

BUILDING MANAGEMENT SYSTEM - BMS

A building wide centralized automated system that is interface able to various systems installed such as Lighting, HVAC, Security, alarms and overall monitoring. This has helped customers economize on any unwanted expenditure on energy wastage and also allows the Admin to immediately identify and resolve issues in a timely manner.

GUEST ROOM MANAGEMENT SYSTEM - GRMS

Hotels and Resorts have been instrumental in bringing in an enhanced guest room experience to their clientele by bringing in automation which provides an easy, single point location which can integrate lights, curtains or blinds, room temperatures and other facilities provided by the Hotel.

SMART OFFICE AND HOME AUTOMATION

VIT has been in the forefront in bringing automation to the offices and homes with the modular implementation of a smart system. This system brings in many systems such as lights, temperature control amongst others under a single umbrella with sleek and tasteful panels replacing the clutter of switches required.

HOSPITALITY SOFTWARE – PMS

We offer an all in one Hotel specific software that can address all aspects of the Hotel from reservations to restaurant management. In our long experience, we have also integrated various other solutions such as IPTV, Telephony and ROP mandated security making it a well-rounded solution with an easy and understandable interface for the staff.

HUMAN RESOURCES MANAGEMENT AND PAYROLL – HRMS

VIT can provide an HR and Payroll system that is an easy, light, web based system that can be implemented for small, medium and large organizations. This covers all the aspects of HR and Payroll providing a complete administrative workflow to the manager.

FIREWALL AND SECURITY SYSTEMS

Unified threat management has been a first line of defence for the security of an organization. VIT has partnered with the leading manufacturers to provide a comprehensive security framework. VIT has been involved with the implementation of VPN tunnels for secure remote access, sandboxing, WAF and advanced threat management.

DISASTER RECOVERY AND BACKUP SOLUTIONS

VIT has been involved in securing the data with data backup and disaster recovery with a real time replication of data to a site in another location. This is extremely vital to strategic organisations where backup and ensuring data security is of paramount importance.

SYSTEMS AND BUSINESS SOFTWARE

Every organisation or business requires a hardware's and software's that enhances business productivity, staff efficiency and better management. VIT is involved with the channel distribution to bring in the latest systems and software's as and when a new product or version is released.

WEBSITE DEVELOPMENT

Our skilled and experienced team of web designers are involved in the design, development and maintenance of websites incorporating the latest coding technologies along with Domain Hosting, Email Hosting, FTP solutions and SEO – search engine optimization that enhances business productivity and brand visibility.
